Provided technical support and troubleshooting for hardware and software issues. Assisted with software installations, backup procedures, and system maintenance. Responded to user inquiries and resolved common IT-related problems. Gained familiarity with confidentiality requirements in a professional setting. Developed strong verbal and written communication skills.

Led a team of four students to develop a web-based application for managing student records. Coordinated tasks, managed timelines, and ensured successful project delivery.

PROJECTS

Laragigs

Developed a web application using HTML, CSS, Bootstrap framework and PHP Laravel framework. The applications allow registered and authorized user to list jobs on the page give them tittle, tag, location, email, description and website of the company, also with the option to manage listing. Guests are able to view listings of various companies looking for PHP Laravel developers and postdate and expiring date and apply through the emails given.

Notes

Developed a web application using HTML, CSS, Bootstrap framework and PHP Laravel framework. The applications allow registered and authorized to create personal notes and manage them basically perform all the (CRUD) operations and also provides option to filter by date created, title, last updated and starred and pinned function as well as the search function.

Smart Zimsec

For the research project, I developed a web application that enables external candidate to locate a nearby schools through the use of geo API. This allows them to register for an exam session making conveniently from their homes or on the go. The project was built using vanilla PHP and JavaScript, HTML, CSS and the Bootstrap framework.
